Professional Summary

Frontend Developer specializing in building scalable, high-performance web applications using Next.js, React, and TypeScript. Strong expertise in state management, API integration, performance optimization, and building clean, maintainable front-end architectures.

Experience

Frontend Developer • Sep 2025 – Present

Titech • Part-time • Damascus, Syria • Remote

- Developed responsive dashboards for a Relief Management System using Next.js, TypeScript, TailwindCSS, and shadcn/ui.
- Integrated file uploads, and API-driven data handling.
- Collaborated with back-end engineers to ensure scalable and reliable front-end integration.

Frontend Developer • Aug 2024 – Nov 2025

Tech Pundits • Full-time • Damascus, Syria • On-site

- Developed PaaS e-learning systems with dashboards, media galleries and file handling.
- Built scalable, high-performance SaaS platforms using modular front-end architecture.
- Implemented advanced state management using Zustand.
- Worked on multilingual platforms and localization-ready interfaces.
- Managed API integration and collaborated closely with back-end teams.
- Led and supported front-end developers, contributing to team efficiency and code quality.
- Translated Figma designs into fully functional, production-ready front-end applications.

Frontend Developer • Dec 2024 – Jun 2025

Logic Software Development • Part-time • Damascus, Syria • Remote

- Tested and validated APIs to ensure reliability and correct data flow.
- Integrated the UI layer with back-end services.
- Integrated third-party services (e.g., OTP-less solutions for OTP and WhatsApp).
- Implemented role-based access control and permissions management.
- Integrated financial workflows, including secure payment and fund transfer processes.

Frontend Developer Intern • Jan 2020 – Oct 2023

Microteach • Full-time • Damascus, Syria • On-site

- Learned how to work with multilingual and localized web platforms.
- Practiced integrating RESTful APIs into front-end projects.
- Assisted in developing and maintaining UI components using React.
- Collaborated with senior developers to fix bugs and improve existing features.
- Gained hands-on experience with responsive design and cross-browser compatibility.

Notable Projects

NexAuth – Next.js Authentication Starter Kit

- Complete Authentication System: Email/password, OAuth, 2FA, and email verification.
- Security & Permissions: JWT session management, bcrypt password hashing, RBAC, and protected routes.
- User Management: Signup, profile updates, account settings, and admin dashboard.
- Modern UI/UX: Radix UI components, responsive design, Tailwind CSS, toast notifications, and real-time form validation.
- Developer-Friendly: Pre-configured NextAuth integration, Prisma ORM, and clear project structure for fast onboarding and customization.

Notion Clone – Full-Stack Productivity Platform

- Real-Time Collaboration: Instant sync across devices with live updates using Convex.
- Rich Document Management: Create, edit, nest, and organize documents hierarchically.
- UI/UX Enhancements: Responsive design, collapsible sidebar, dark mode, and dynamic breadcrumbs.
- Authentication & Security: User management with Clerk and secure database access via RLS.
- File Handling: Efficient handling of document covers and media using EdgeStore.
- Optimized Workflows: Optimistic UI updates, seamless integration of real-time APIs, and multi-user SaaS-ready architecture.

Flexify – Portfolio Application

- Public Portfolio: Hero section, statistics, about, services, featured projects, testimonials, and contact form.
- Admin Dashboard: CRUD for projects, services, categories, technologies, testimonials, users, and site settings.
- Technical Excellence: Server & client components, TypeScript type safety, React Hook Form + Zod validation, Axios API integration, optimized images, error boundaries, and smooth animations with Framer Motion.
- State & API Management: Zustand for client state, React Query for server state with caching and optimistic updates.

Vendo – Multi-Store E-commerce CMS

- Built a scalable multi-tenant E-commerce platform with Next.js and TypeScript, featuring a centralized Admin Dashboard and public storefront.
- Implemented secure auth (NextAuth v5), Stripe payments, and webhook-driven order automation.
- Designed clean APIs, relational database models (Prisma/PostgreSQL), and high-performance UI using Tailwind, Radix UI, Zustand, and TanStack Query.

Technical Skills

Frontend Technologies: • Next.js. • React.js. • TypeScript. • Redux Toolkit, Zustand & Zod. • TailwindCSS, SASS/SCSS & Framer Motion. • ShadCN, Material UI & ReUi. • TanStack Query & Axios.	Design, Software & Tools: • Figma & Adobe XD. • Postman & APIDog. • Notion, ClickUp, Geria & GoodDay. • Vercel & Netlify. • GitHub & GitLab. • Draw.io. • AI tools
Backend & APIs (Working Knowledge): • Nodejs & NestJS. • Supabase, Convex & Neon. • MySQL & PostgreSQL. • JWT Authentication. • Prisma & TypeORM. • Firebase.	Skills & Professional Tools: • Unit & Integration Testing (Playwrite). • Internationalization (i18next & next-intl). • SEO Optimization. • Responsive Design. • Project Management Tools. • Design System (Storybook).

Education

B.Sc. in Biomedical Engineering

Damascus University — 2020 to 2025

Languages

- Arabic — Native.
- English — Beginner (Actively improving).
